DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 29 March 2021 at 09:10 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be predominantly Low today, thanks to strong winds originating from the Atlantic. However, elevated pollution levels are currently being observed in parts of South Wales, with some areas of Moderate air pollution possible in parts of the Northern Isles.

Tomorrow: Air pollution levels are expected to remain predominantly Low on Tuesday. However, some isolated pockets of Moderate air pollution may persist in northern Scotland and the Northern Isles.

Outlook: Isolated pockets of Moderate air pollution are still likely in northern Scotland and the Northern Isles throughout this period. Some very warm and sunny conditions may cause air quality to worsen in England and Wales on Wednesday, with Moderate or possibly High pollution levels in places, mainly around urban areas.
